Art Unit 123

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11, drawn to An erythromycin, classified in Class 536, subclass 9.

II. Claims 12-21, drawn to a methylation process, classified in Class 536, subclass 9.

III. Claim 22, drawn to a method of controlling bacteria, classified in Class 424, subclass 181.

THE INVENTIONS ARE SEPARATE AND DISTINCT, EACH FROM THE OTHER BECAUSE OF THE FOLLOWING REASONS:

Inventions of group I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown, (1) that the process as claimed can be used to make other and different products or (2) that the product as claimed can be made by another and materially different process. See MPEP 806.05(f). In the instant case the product can be made by a materially different process, such as by cleaving the corresponding N-trifluoroacetyl-11-aza compound followed by reaction with dimethyl sulfate.

Inventions of groups I and III are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown (1) the process for using the product as claimed can be practiced with another materially

different product or (2) the product as claimed can be used in a materially different process of using. See MPEP 806.05(h). In the instant case the process can be practiced with another materially different product, such as the compounds disclosed in applicants' patent No. 4,328,334.

Because the inventions are distinct for the reasons given above and have acquired separate status in the art restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this action to be complete must include an election of the Invention to be prosecuted even though the requirement be traversed.

Applicant is given 30 DAYS from the date of this letter to make an election to avoid a question of abandonment.
